

*The new Shriners
Hospitals for Children
needs your help
to grow.*

Support the
**Exceptional Care
for Exceptional Kids**
Campaign.

The new Shriners Hospitals for Children® – Canada will take caring to a whole new level.

This brand new state-of-the-art facility will serve as a centre of excellence in pediatric orthopaedic research, teaching and care. Slated to open its doors in Fall 2015, it will have a greatly increased capacity, offer more services and house the most advanced medical technologies.

The design will reflect the hospital's clientele from across the country. Each floor will feature the colours and attractions of a different region of Canada. These concepts have not only been incorporated into the decor of the floors, but have also been cleverly integrated into the design of the various service, treatment and waiting areas. Its intelligent architecture, which maximizes natural light, will significantly contribute to the healing process.

An exceptional campaign for an exceptional hospital.

The **Exceptional Care for Exceptional Kids** Campaign was created to raise \$130 million for this project. \$127 million is allocated to complete the construction and to equip the new facility, and an additional \$3 million to establish the Francis Glorieux Chair in Pediatric Musculoskeletal Research.

 3. Ambulatory Care waiting room

Think big!

Despite its relatively small size, our hospital welcomes and treats an increasing number of kids from all over the country, the US and around the world. The ultimate goal of moving to new facilities is to provide our patients with even better care.

In the new facility:

- We will be moving up from 89,000 ft² to over 207,000 ft².
- We're increasing the number of operating rooms from 2 to 4.
- We will have 29,000 ft² dedicated to research compared to 15,000 ft².
- Space allocated to ambulatory care will be three times larger and better positioned.
- 13,000 ft² will be devoted to rehabilitation services, close to three times the current area.

To serve the needs of our patients of today and tomorrow, and to continue to provide them with the best care possible, we plan on delivering the following new services:

Surgical skills laboratory

The hospital's new surgical skills lab, a first in the Shriners Hospitals network, will provide a controlled setting where basic and complex surgical techniques can be learned and practiced before applying them to patients.

Movement analysis laboratory

Using sophisticated technology, body sensors and cameras, this advanced testing and analysis lab will help with the diagnosis in order to ensure the best possible treatment for each patient.

Education centre

The new hospital will feature the Shriners network's first education centre built to provide a high-tech learning environment.

Helping exceptional kids to get better with exceptional new facilities.

The new hospital will feature state-of-the-art technologies and facilities for enhanced care, including the latest surgical assist technology, intra-operative 3D imaging and a number of new specialty programs.

Cutting-edge research – from the lab to the bedside.

The Shriners Hospitals for Children network is recognized worldwide for discoveries that have literally changed the lives of more than 1 million children. We know that excellence in pediatric care can only occur by pursuing excellence in research, so we've dedicated an entire 29,000-square-foot floor of the new hospital as well as a clinical investigation unit to the pursuit of the kind of research that generates significant breakthroughs. In addition, the Francis Glorieux Chair in Pediatric Musculoskeletal Research will help to support ongoing excellence in research.

Help us to help kids.

**An unprecedented fundraising campaign to help
secure a brighter future for children.**

For the first time in its history, Shriners Hospitals for Children – Canada calls upon the generosity of people from across the country. The goal of the **Exceptional Care for Exceptional Kids** Campaign is to raise \$130 million.

By supporting the Campaign you help us build state-of-the-art facilities with advanced technologies and recruit the best pediatric specialists.

With your support, this hospital will be a true model of excellence.
